RE: Mining Operations - Snowflake 30-31
Millard County - IMC# 238650-1

Dear Mr. Clark:

We have reviewed a description of the mining operations as submitted to the Bureau of Land Management. We received a copy of the notice from the Bureau on December 20, 1993.

The plan we received describes mining between 10 to 50 tons of ore containing Perlite.

It does not appear that the operation as described will have any water quality impacts. No permit is required for the stated activities. However, you must advise us for review of any water quality impacts if your activities generate any wastewater which would be discharged to the ground or surface waters of the State.

If we can be of further assistance, please contact Mr. Lyle W. Stott of my staff

Sincerely,

Kiran L. Bhayani, P.E., D.EE., Manager
Design Evaluation Section
